

BMO ARK Innovation Fund

Innovation is Key to Growth

- The global economy is undergoing one of the largest technological transformations in history¹ displacing industry incumbents and creating new leaders, enablers, and beneficiaries of disruptive innovation.
- ARK focuses solely on offering investment solutions to capture disruptive innovation that span market capitalization and sectors with low overlap to broad-market indices.
- Invests in five major innovation platforms that are evolving and converging at the same time: **Artificial Intelligence, Energy Storage, Robotics, DNA Sequencing, and Blockchain Technology.**

Why Innovation?

Invest In The Future Today

Innovation could displace industry incumbents, increase efficiencies, and gain majority market share. This technologically enabled change offers long-term opportunities for companies and investors alike.

Take Advantage Of Market Inefficiencies

Market inefficiencies, such as short-term time horizons, siloed investment styles, closed off research mentality, or backwards looking indices may cause investors to miss out on future growth driven by disruptive innovation.

Make The World More Innovative

Good innovation investing should focus on technologies and companies that are likely to have a positive impact on our society, and the world's ability to create further innovations.

The ARK Difference

ARK Investment Management LLC (ARK) was founded in January 2014 by Catherine (Cathie) Wood and has \$23.1 billion² in assets under management. It focuses solely on offering investment solutions to capture disruptive innovation in the public markets. As the Founder, CEO and CIO of ARK, Cathie appears regularly on CNBC, Bloomberg, and Fox Business, among other broadcast news, and has been featured and quoted in The Wall Street Journal, Forbes, Fortune, Barron's, New York Times, and numerous other media outlets. As a thought leader for investing in disruptive innovation, Cathie has been widely recognized for her vision and impact in the financial industry.

“Innovation should displace industry incumbents, increase efficiencies, and gain majority market share. More Importantly, disruptive innovation impact and concerns all of our lives.”

Catherine Wood, Founder, CEO and CIO of ARK Investment Management LLC

Innovation is Expanding Now

ARK has identified five major innovation platforms that are evolving and converging at the same time: **Artificial Intelligence, Energy Storage, Robotics, DNA Sequencing, and Blockchain Technology**. According to their research, enterprise value³ attributable to companies that participate in the underlying technologies attributable to these innovation platforms increased from roughly \$7 trillion in 2019 to almost \$14 trillion in 2020 and is forecasted to grow to \$210 trillion by 2030.⁴ The global economy is undergoing the largest technological transformation in history.

\$210 Trillion
estimated 2030 enterprise value⁴

BMO ARK Innovation Fund Benefits

- Invests in companies at the forefront of technology-enabled innovation, in some of the most promising areas of the economy, with potential for long-term growth.
- Adds diversification to portfolios with negative correlation to traditional value strategies and low correlation to a number of core asset classes and traditional growth strategies.⁵
- Constant focus on secular trends and disruptive innovation that can complement traditional strategies and core portfolios due to low overlap of holdings.

⁵ Traditional value investing is an investment strategy where stocks are selected that trade for less than their intrinsic values. Traditional growth investing is an investment strategy that focuses on stocks, whose earnings are expected to grow at an above-average rate compared to its industry or the overall market. Correlation is the degree to which two strategies move in relation to each other.

Investment Process: Combining Top-Down & Bottom-Up Research

Case Study: Artificial Intelligence (AI)⁷

Artificial Intelligence could scale from almost \$2.5 trillion in 2021 to \$87 trillion in enterprise value by 2030, in part due to convergence across technologies.

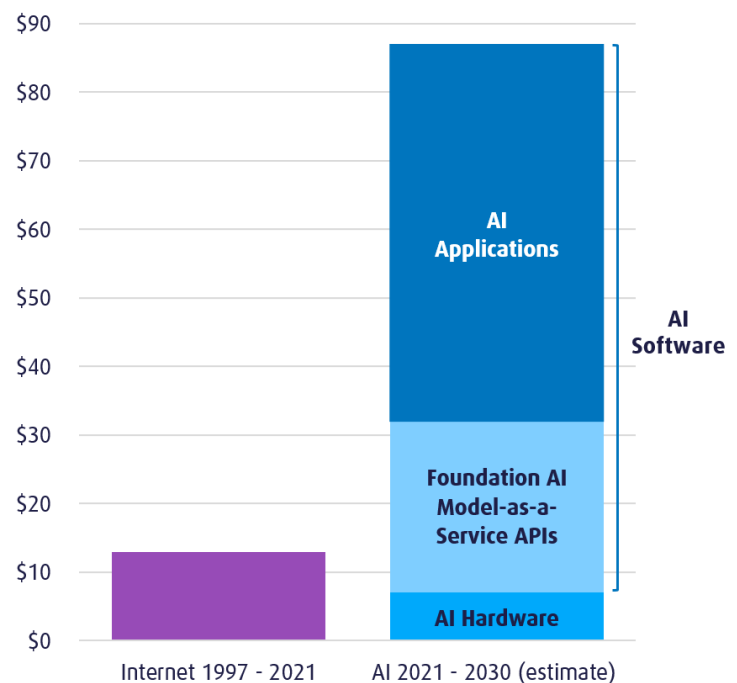

The convergence of robotics, battery technologies, and artificial intelligence is likely to collapse the cost structure of transportation, impacting the economics of auto, rail, and airline activities.

The convergence of next generation DNA sequencing, artificial intelligence, and gene therapies should boost returns on investment significantly, potentially creating a golden age of health care likely to rival that of the eighties and nineties.

By 2030, AI software companies could produce \$14 trillion in annual revenue collectively. The resulting \$4 trillion in free cash flow could create over \$80 trillion in enterprise value, up from \$2.3 trillion in 2021.

By 2030, AI hardware companies could produce \$1.7 trillion in annual revenue collectively. The resulting \$350 billion in free cash flow could create \$7 trillion in enterprise value.

Enterprise Value (Trillions, USD)
