BMO ETF Index Funds can be used as effective portfolio building blocks or satellites to tilt a portfolio using broad market indices to where you see growth potential. By complementing your active portfolio with BMO ETF Index Funds, your clients can get the best of both worlds with enhanced diversification and the ability to outperform through asset allocation. During strong bull markets, when indices appreciate rapidly, broad market funds have historically outperformed most active funds while still providing the benefits of lower fees and diversification.

Commissions, management fees and expenses all may be associated with investments in mutual funds. Trailing commissions may be associated with investments in certain series of securities of mutual funds. Please read the fund facts, ETF facts or prospectus of the relevant mutual fund before investing. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

For a summary of the risks of an investment in the BMO Mutual Funds, please see the specific risks set out in the prospectus. ETF Series of the BMO Mutual Funds trade like stocks, fluctuate in market value and may trade at a discount to their net asset value, which may increase the risk of loss.
