Market Corrections Are Not Uncommon

The issue – Markets can have negative returns. Over the past 42 calendar years there's been a point in every year where returns were negative, even in years where the market had great performance...

The solution – remaining invested in equities could be the best solution for investors with a long-term time horizon

S&P TSX Calendar Year Return vs. Largest Intra-Year Decline
(1980 - 2022)

Why Staying Invested Works

The market increased 73% from March 2020 to March 2022. If you stayed invested during the volatility of early 2020, your portfolio would have participated in these gains.
